JOHNSON OUTBOARD OIL

We recommend using JOHNSON OUTBOARD LUBRICANT.

JOHNSON OUTBOARD LUBRICANT is designed specifically for Johnson outboard motor use at a 50 to 1 gasoline to lubricant ratio for engine break in and after break in, new and older models. This improved lubrication is formulated to provide additional benefits such as: exceptional lubrication, less varnish and combustion chamber deposits, better spark plug life, good mixability with gasoline even in cold weather, and reduction of pre-ignition.

CAUTION

If Johnson Outboard Motor Lubricant should not be available, see lubrication instructions Section 2.

USE ONLY THE RECOMMENDED OIL TO GASOLINE MIXTURE, REGARDLESS OF THE CLAIMS MADE FOR SOME OILS.

SPURIOUS PARTS

It is recommended that only genuine factory approved replacement parts be used. Replacement parts not manufactured nor approved by Johnson Motors, should not be used.

Failure resulting from use of parts inferior to those manufactured or approved by Johnson Motors, will not be covered under warranty.
